

3(4)-day course at the Chair of Industrial Chemistry, University of Oldenburg

Location: University of Oldenburg, Industrial Chemistry (faculty 5), Carl-von-Ossietzky Str. 9-11,  
Oldenburg-Wechloy (Oldb.), Germany  
Dates: February 22<sup>nd</sup> – 24<sup>th</sup> (25<sup>th</sup>), 2011  
Instructors: Prof. Dr. J. Gmehling and/or Prof. h.c. Dr. J. Rarey

## Course Description

A sound knowledge of process engineering fundamentals becomes increasingly important due to the broader application of process simulation software for the development (synthesis), design and optimization of chemical processes. Within this course participants from industry and academia should become familiar with the possibilities and limitations of currently used methods and models. The course will focus on those aspects, which we consider to be of primary importance for the successful modeling of single separation units or whole chemical plants.

Besides the thermodynamic properties of pure components, especially the behavior of multicomponent mixtures will be covered with special attention to phase equilibria, also those of electrolyte systems.

Following a detailed discussion of the basics of thermodynamics, various approaches to process engineering problems using modern thermodynamic methods will be presented.

These include for example hybrid or pressure swing processes, the selection of suitable entrainers for special separation processes like azeotropic and extractive distillation, extraction as well as a discussion of reactive distillation.

Participants should gain an improved understanding of the various graphical representations of the real behavior of mixtures such as plots on solvent-free basis, contour lines, residual curves incl. boundary lines or surfaces, azotropic points, ...). Practical tutorials are included to deepen the understanding of the various topics. The course will be held in English.

Following the first 3 days an optional fourth day offers a workshop on thermophysical properties including data retrieval, examination and evaluation, regression and estimation as well as parameter verification for use in process simulation. On the last day, the number of participants is limited to 10 due to the limited number of computers in the training room. As software, mainly the Dortmund Data Bank (DDB) together with the integrated software package are used.

## Registration

Space is limited and early registration is recommended. The number of participants is limited to 25. Up to 7 students of the University of Oldenburg will be given the possibility to participate.

Registration fee is € 1040.- (€ 1310.- for 4 days). Participants from member companies of GVT receive a discount of € 50.-. The course fee is tax free according to German law (§ 4 Ziffer 22 UStG-MwSt.). The registration fee includes a copy of the course material, morning and afternoon refreshments, snacks and a get-together party at a local restaurant.

## Timetable

Tuesday, 02/22/2011	10.00 - 10.30	<b>Welcome, Introduction</b> <ul style="list-style-type: none"><li>- Introduction of the Participants</li><li>- Importance of Physical Properties for the Synthesis, Design and Optimization of Chemical Processes</li><li>- Research Activities incl. History and Development of the Dortmund Data Bank (DDB) and the Integrated Software Package</li><li>- History and Development of Thermodynamic Models</li><li>- Technical Information</li></ul>	
	10.30 - 12.15	<b>Pure Component Properties I</b> <ul style="list-style-type: none"><li>- PvT-Behavior of Pure Components</li><li>- Equations of State, Corresponding State Principle</li><li>- Critical Data</li><li>- Residual Functions</li></ul>	
	12.15 - 13.15	Lunch Break	
	13.15 - 14.45	<b>Pure Component Properties II</b> <ul style="list-style-type: none"><li>- Vapor Pressure, Enthalpy of Vaporization</li><li>- Melting Temperature as f(T), Viscosity, Thermal Conductivity</li><li>- PURE Data Bank, Molecular Structures and Property Estimation</li></ul>	
	14.45 - 15.30	<b>Importance of Phase Equilibria Thermodynamic Fundamentals I</b> <ul style="list-style-type: none"><li>- Auxiliary Functions <math>\gamma_i</math>, <math>\phi_i</math></li><li>- Activity Coefficient Models (<math>g^E</math>-Models)</li><li>- Calculation of Vapor-Liquid Equilibria</li></ul>	
	15.30 - 15.45	Coffee Break	
	15.45 - 17.15	<b>Thermodynamic Fundamentals II</b> <ul style="list-style-type: none"><li>- Parameter Fitting, Consistency Tests, ...</li><li>- Activity Coefficients at Infinite Dilution</li><li>- Excess Enthalpies</li><li>- Simultaneous Description of Phase Equilibria and Excess Properties (Recommended Values)</li><li>- Separation Factors and Azeotropic Points as Function of Temperature</li></ul>	
	19.00	<b>Dinner</b>	
	Wednesday, 02/23/2011	9.00 - 10.30	<b>Introduction to MathCAD, Tutorial "Pure Component Properties", Tutorial "Phase Equilibria"</b>
		10.30 - 10.45	Coffee Break
10.45 - 11.15		<b>Thermodynamic Fundamentals III</b> <ul style="list-style-type: none"><li>- Equations of State, Mixing Rules</li></ul>	
11.15 - 12.15		<b>Special Phase Equilibria I</b> Liquid-Liquid Equilibria, Gas Solubilities, Solid-Liquid Equilibria, Supercritical Extraction, Osmotic Pressure	
12.15 - 13.15		Lunch Break	
13.15 - 14.30		<b>Special Phase Equilibria II</b> Electrolyte Systems	

	14.30 -	16.00	<b>Group Contribution Methods for the Estimation of Phase Equilibria</b> - UNIFAC, mod. UNIFAC - Equations of State, Mixing Rules, Modern Group-Contribution Equations of State (e.g. PSRK, VTPR)
	16.00 -	16.15	Coffee Break
	16.15 -	17.30	<b>Application of the Dortmund Data Bank, DDBSP</b>
	17.30 -	19.00	<b>Laboratory Tour and Discussion (for Interested Participants)</b>
Thursday, 02/24/2011	9.00 -	9.30	<b>Quantum-Mechanical Methods (COSMO-RS, ...)</b>
	9.30 -	11.00	<b>Different Applications of <math>g^E</math>-Models</b> - Residual Curves, Distillation Lines, Boundary Curves/Surfaces <b>Special Separation Processes</b> - Extractive and Azeotropic Distillation <b>Criteria for Entrainer Selection</b> - Using Thermodynamic Models - Using The DDB - Extractive and Adductive Crystallization - Demonstration of the Program Package SYNTHESE
	11.00 -	11.15	Coffee Break
	11.15 -	12.15	<b>Tutorial "Thermodynamic Properties and Application"</b>
	12.15 -	13.15	Lunch Break
	13.15 -	14.45	<b>Reactive Distillation, Discontinuous Distillation, Absorption, Extraction, Supercritical Extraction, Crystallization, Adsorption, Membrane Processes</b>  <b>Further Applications of <math>g^E</math>-Models and Equations of State (e.g. Chemical Equilibria)</b>
	14.45 -	15.00	Coffee Break
	15.00 -	16.30	<b>Tutorial Separation Technology (partly with Computer)</b>
	16.30 -	17.30	<b>Summary</b>
Friday, 02/25/2011	9.00 -	12.15	<b>Workshop: Introduction to the Dortmund Data-bank and the Integrated Software Package DDBSP</b> - General Structure, References, Components, Data - Introductory Training - Pure Component and Mixture Properties - Data Retrieval, Graphical Representations - Parameter Regression
	12.15 -	13.15	Lunch Break
	13.15 -	16.00	<b>Advantages of Simultaneous Data Regression Property Estimation and Parameter Verification for Process Simulation</b> <b>Other Data Sources: Beilstein Crossfire, ...</b>
	16.00 -	16.30	<b>Discussion, Results</b>

# ORGANISATION

The course starts on Tuesday morning at 10 am and ends on Thursday at 5.30 pm (resp. Friday at 4.30 pm). Oldenburg (Oldb.) is situated approx. 45 km west of Bremen (the nearest international airport), and can be conveniently reached by train. For participants arriving by plane, a transfer from Bremen airport can be reserved in advance ([www.luftibus.de](http://www.luftibus.de)), which should be booked one week in advance. Oldenburg can also be reached by car via highways from all directions. Details on the contents of the course can be found in the timetable above. A get-together party at a local restaurant is included.

For registration please contact with the enclosed registration form:

Forschungs-Gesellschaft Verfahrens-Technik e.V.  
Theodor-Heuss-Allee 25, 60486 Frankfurt am Main  
**Tel.:** +49 - 69 - 7564-118  
**FAX:** +49 - 69 - 7564-414  
**E-mail:** GVT-Hochschulkurse@Dechema.de  
**Subject:** University Course „Thermal Separation Processes“

Please transfer the course fee using the subject given above to the account 930 945 00, BLZ 500 800 00, Dresdner Bank AG, Frankfurt but not before having received the final confirmation of participation by GVT. The course fee is tax free in Germany (§ 4 Ziffer 22 UStG-MWSt.).

## Lecturers

### Prof. Dr. Jürgen Gmehling

---

1962 - 1965 Education as Laboratory Technician at Duisburger Kupferhütte / Duisburg  
1965 - 1968 Study of Chemical Engineering at School of Engineering, Essen  
1968 - 1970 Study of Chemistry at the Universities of Clausthal and Dortmund  
1973 PhD at University of Dortmund ( Inorganic Chemistry )  
1977 – 1978 Research stay in Berkeley, USA ( Prof. Dr. J. M. Prausnitz )  
1982 Habilitation at Institute for Chemical Engineering, University of Dortmund (Venia Legendi for Industrial Chemistry)  
1970 - 1989 Scientific co-worker, Privatdozent and associated Professor at University of Dortmund  
since 1989 Professor (C4) Technical Chemistry, University of Oldenburg  
President/CEO of DDBST GmbH, Oldenburg  
since 1999 Director of LTP GmbH, Oldenburg  
Author of DECHEMA Chemistry Data Series (VLE, hE,  $\gamma^\infty$ ) and "Azeotropic Data" (Wiley-VCH Weinheim) (>40 parts), Author of "Vapor-Liquid Equilibria Using UNIFAC" and the textbooks "Thermodynamik", "Lehrbuch der Technischen Chemie II – Grundoperationen" and " Thermodynamik der Phasengleichgewichte", "Thermische Verfahrenstechnik" in Winnacker-Küchler (2004), Arnold-Eucken-Preis of GVC 1982 and Rossini Lecture Award 2008, more than 360 publications in scientific journals.  
Elected member of different boards of GVC and DECHEMA and member in various editorial boards.

### Prof. h.c. Dr. Jürgen Rarey

---

1979 - 1985 Study of Chemistry, University of Dortmund  
1985 - 1989 Scientific co-worker in the group of Prof. Gmehling (Institute for Chemical Engineering, Univ. of Dortmund)  
1991 PhD at University of Dortmund (Institute for Chemical Engineering)  
since 1989 Scientific co-worker with Prof. Gmehling at University of Oldenburg  
Director of DDBST GmbH, Oldenburg  
since 2004 Honorary Research Fellow at the School of Chemical Engineering, University of Kwazulu-Natal, Durban, South Africa  
since 2005 Honorary Professor (Kwazulu-Natal, Durban, South Africa)

Co-author of DECHEMA Chemistry Data Series (4 books), approx. 37 publications in scientific journals

The registration fee is € 1040 (€ 1310 for 4 days) and for participants from corporate members of GVT € 990 (€ 1260 for 4 days). Please do not transfer the fee before receiving confirmation of participation by GVT. For cancellations received by 22 January 2011, the participation fee will be reimbursed less a processing charge of € 50,-. After that date a reimbursement cannot be made, however it is still possible to nominate a replacement. Our fees are not liable to Value Added Tax (tax exemption in accordance with § 4.22 UstG), since GVT has nonprofit status.
